

Consent and Release of Liability

The Setas Seminary Mission

Setas Seminary catalyzes the conscious integration of physical and psychological wellness by facilitating unification with the universal spiritual intelligence aided by the natural sacrament of entheogenic fungi.

Our Intention

Our church offers a unique approach to integrated spirituality aided by psilocybin sacrament. The purpose of the sacrament is to enhance personal and spiritual growth, healing, and mental wellness. It is our priority to create and maintain a safe environment conducive for achieving awareness, clarity, and whole health.

Potential Benefits and Risks

Our methods require a sincere commitment to elevating individual knowledge base and practices toward whole wellness and spiritual integration. The use of entheogenic fungi enhances the process by providing for deep insights, emotional release, and unification with the universal spirit. These enhanced states however may also awaken unpleasant feelings which need to be acknowledged and processed for growth and integration. Moreover, specific medical history and/or psychoactive medications may increase risk for an adverse event. Setas Seminary makes every effort to inform and educate, but ultimate responsibility for entheogenic practice lies with the individual under the guidance of their personal healthcare professional. Setas Seminary does not provide medical services. As such, we require consent, release of liability, and indemnification for active church membership.
